# HOW TO GET YOUR DATABASES INTO THE CLOUD

Cloud: the next frontier?

Azure offers many solutions to get your databases into the cloud.

SQL Server

MySQL

Maria DB

PostgreSQL

MongoDB

Cassandra

# Andre Essing

## Technology Solutions Professional

### Microsoft Deutschland GmbH

Andre advises customers in topics all around the Microsoft Data Platform. Since version 7.0, Andre gathering experience with the SQL Server product family. Today Andre concentrates on working with data in the cloud, like Modern Data Warehouse architectures, Artificial Intelligence and new scalable database systems like Azure Cosmos DB.

# DATA PLATFORM CONTINUUM

# PaaS helps you focus on your business...

Your work so far	How PaaS helps?
Hardware purchasing and management	<b>Built-in</b> Scales on-demand
Protect data with backups	<b>Built-in</b> Point-In-Time-Restore
Updates and upgrades	<b>Built-in</b>
HA	<b>Built-in</b> 99.99% SLA and auto-failover
DR	<b>Built-in</b> Geo-redundancy and geo-replication
Compliance with standards on your own	<b>Built-in</b> / easy to use features
Secure your data from malicious users and mistakes	<b>Built-in</b> / easy to use features
Monitor, troubleshoot and manage at scale	<b>Built-in</b> / easy to use features
Tune and maintain for predictable performance	<b>Built-in</b> / easy to use features

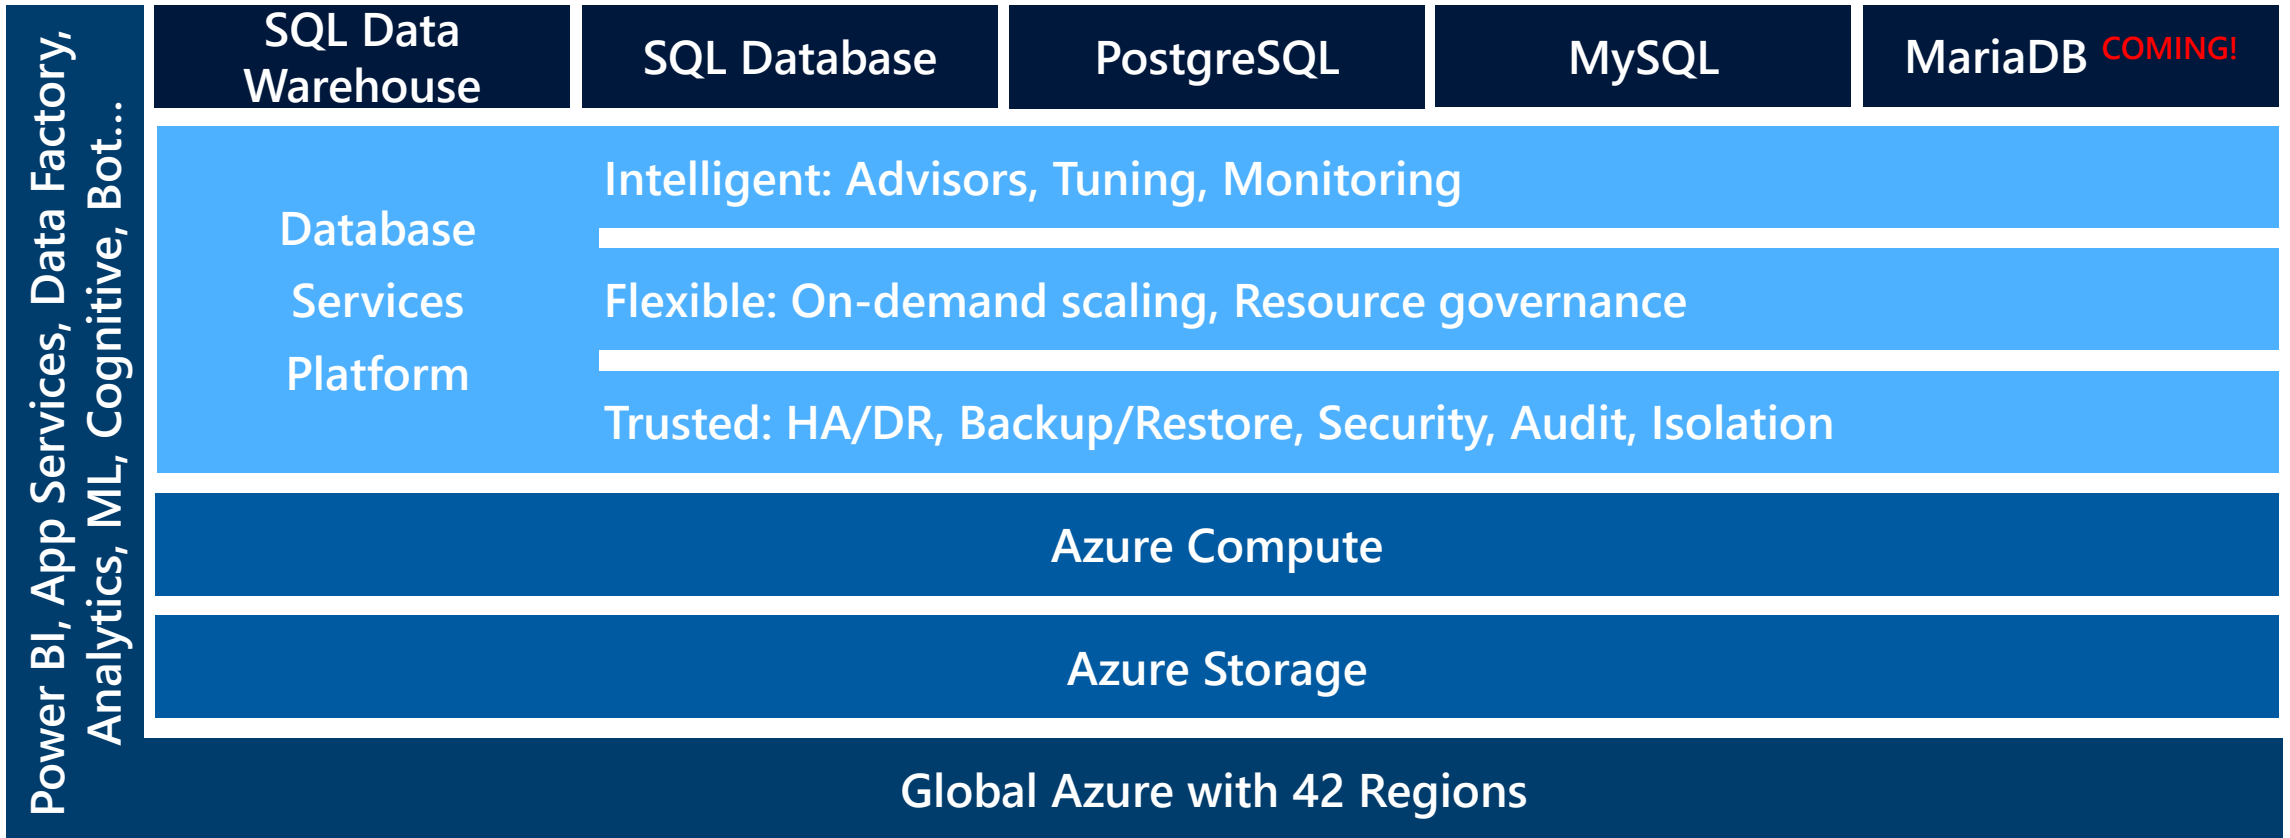

A man with a beard, wearing a dark blazer over a white t-shirt, sits on a modern balcony chair. He is looking down at a laptop on his lap with a thoughtful expression, his hand resting on his head. The balcony has a glass railing and overlooks a cityscape with trees and buildings. The scene is bathed in warm, golden light, suggesting late afternoon or early morning. The text 'What about me?' is overlaid in white on the left side of the image.

# What about me?

If everything is done for me, let's get lazy?

# Database Systems in Azure

# AZURE RELATIONAL DATABASE PLATFORM

# AZURE SQL DATABASE

THE INTELLIGENT RELATIONAL CLOUD DATABASE SERVICE

## Learns & adapts

Realize automatic performance improvements from continuous assessments

## Scales on the fly

Change service tiers, performance levels, and storage dynamically with minimal downtime.

## Enables multi-tenant SaaS apps

Easily manage and monitor multitenant apps, and benefit from database isolation

## Works in your environment

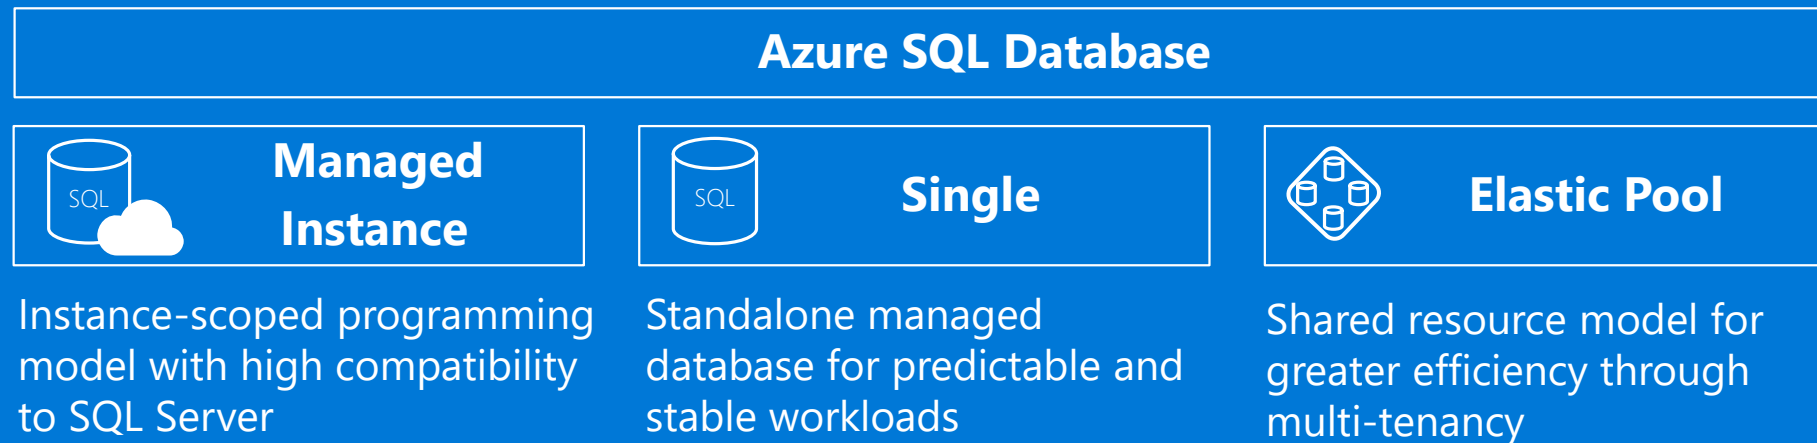

Develop your app and connect to SQL Database with the tools and platforms you prefer

## Secures & protects

Build security-enhanced, highly compliant apps with built-in protection and intelligent Threat Detection

# INTRODUCING AZURE SQL DATABASE MANAGED INSTANCE

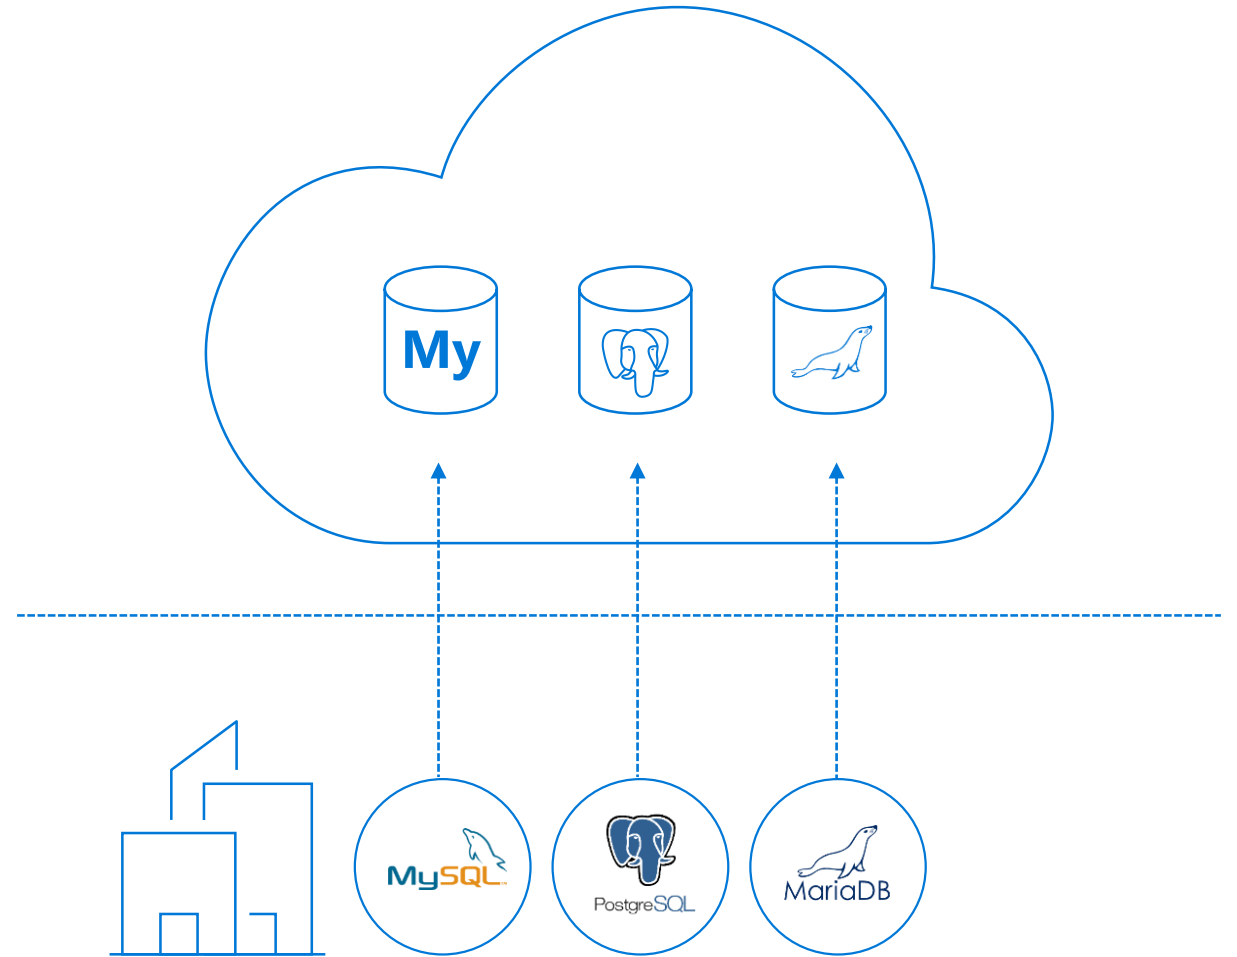

# MANAGED COMMUNITY MYSQL, POSTGRESQL, AND MARIADB

Focus on your apps by leaving the management and patching of your infrastructure and database to an enterprise-ready cloud service

Automatic updates

Automatic security fixes

Automatic new feature updates

# AZURE SQL DATA WAREHOUSE

The Fast, Familiar and Flexible data warehouse in the Cloud

**Flexible**

Fit your Needs

**Trusted**

Secure. Compliant. Reliable.

**Performant**

Unlimited Scale

---

Seamlessly compatible with  
Microsoft & 3<sup>rd</sup> party services

# Distributed queries

Result

# AZURE COSMOS DB

A globally distributed, massively scalable, multi-model database service

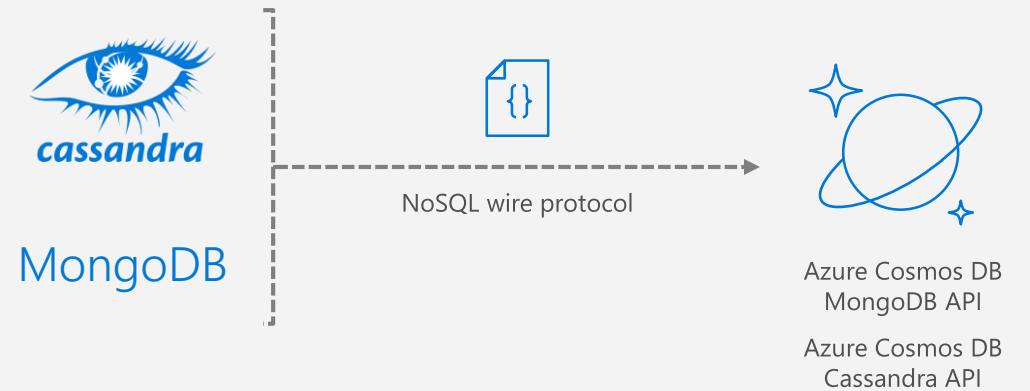

Get your data into Azure

# EASY TO LIFT AND SHIFT NOSQL APPS TO AZURE COSMOS DB

Make data modernization easy with seamless lift and shift migration of NoSQL workloads to the cloud.

- Azure Cosmos DB MongoDB API and Cassandra API bring app data from existing MongoDB and Cassandra deployments
- Leverage existing tools, drivers, and libraries, and continue using existing apps' current SDKs
- Turnkey geo-replication
- No infrastructure or VM management required

# MIGRATION METHODS OSS DATABASES

## 1. MySQL dump and PG dump

Native commands, no additional

## 2. Migration wizard

Native or 3rd party tools

## 3. Replication

[Attunity](#), near-zero down time migration

## 4. Azure Database Migration Service (Preview)

- 
- Native way, no additional setup
  - Use when application can tolerate downtime

- 
- Third party solution, needs setup
  - Use when application **cannot** tolerate downtime

- 
- Fully-orchestrated migration service
  - Public Preview starting in the first-half of 2018
  - Sign up [here](#)

# MIGRATION RESOURCES FOR FAST DEPLOYMENTS

ACCELERATE YOUR JOURNEY TO THE CLOUD

## **SQL Server Migration Assistant (SSMA)**

Automates database migration to SQL Server from Microsoft Access, DB2, MySQL, Oracle, and SAP ASE.

## **Data Migration Assistant (DMA)**

Enables upgrade SQL Server and Azure SQL Database.

## **Azure Database Migration Service (preview)**

A seamless, end-to-end solution for moving on-premises SQL Server, Oracle, and other relational databases to the cloud.

Works in your environment

# AZURE DATABASE MIGRATION SERVICE

Accelerate your journey to the cloud

## Azure Database Migration Service (Azure DMS)

A seamless, end-to-end solution for moving on-premises SQL Server, Oracle, and other relational databases to the cloud.

# Pricing for DMS

Basic: small-to-medium size data migration

General Purpose: large size data migration

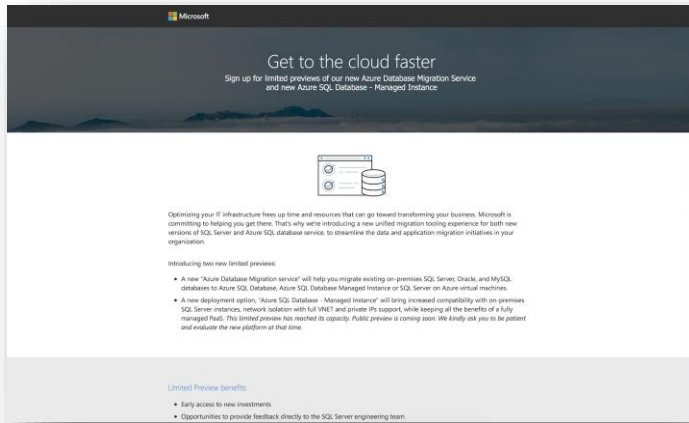

## Azure Database Migration Service Pricing

VCORE(s)	Basic preview price*	General Purpose preview price*
1	Free	N/A
2	Free	N/A
4	N/A	Free

\*Limited-time promotion. Try the service for free from now until January 31, 2018. Free preview is only applicable for SQL Server to Azure SQL Database migrations.
